

Important!

Do Not Delay!

Immunization Form REQUIRED for you to proceed with Class Registration at UCF

Obtaining proof of immunizations may be a time-consuming process, so start now!

1. UCF will accept the official State of Florida Immunization form, issued by local health departments, stamped high school transcripts, military immunization forms, and physician's office records (**signed and stamped**) in conjunction with completing the UCF Immunization form. If you have supporting documentation, attach it to a completed UCF Immunization form. The UCF immunizations form is available on the UCF website along with the link you will need to upload your documents at www.studenthealth.ucf.edu/immunizations.
2. The Advisory Committee on Immunization Practices (ACIP) has recommended that college freshman living in residence halls receive vaccinations for meningococcal meningitis. By action of the Florida State University System Board of Governors, this recommendation is supported by the policy effective July 1, 2008 that "all NEW matriculating students must provide documentation of vaccinations against meningococcal meningitis and hepatitis B or provide a signed waiver for each declined vaccination."

Accurate and complete immunization information is required for registration at UCF. Incomplete information may result in your registration being delayed or even blocked. Please follow these directions:

Name/phone, etc. Print all information legibly. **Provide UCF ID number**

Section A: Required Immunizations. Required for **EVERYONE** born after Dec. 31, 1956.

1. MMR: This combination vaccine is often given because it protects from measles, mumps, and rubella. Two doses are required for entry into UCF. (1) The first dose must have been received at 12 months of age or later and in 1971 or later. (2) The second dose must have been received at least 30 days after the first dose as per CDC guidelines.

OR

Measles (Rubeola): Two doses are required. (1) The first dose must have been received at 12 months of age or later and in 1968 or later. (2) The second dose must have been received at least 30 days after the first dose.

AND

Rubella (German Measles): One dose is required at 12 months of age or later and in 1969 or later.

2. Hepatitis B (HBV) immunization: You are encouraged to receive this series. Students in many Academic Health Programs are required to have the HBV series. Students wishing to decline this vaccine must read the information provided below. Signing a waiver indicates that you understand the possible risk involved in not receiving this immunization. If you are under the age of 18, a parent or guardian must sign the waiver for you. The vaccine is usually administered as a three-dose series on a 0-, 1-, and 6-month schedule. The 2nd dose should be given 1 month after the first dose; the third dose should be given at least 2 months after the second dose and at least 4 months after the first dose. The Hepatitis B two-dose schedule "Recombivax" should be supported by an official document and the 2nd shot is administered 4-6 months after the first one.

* Twinrix (Hepatitis A/B) series may be used as a substitute for the Hepatitis B series.

3. Meningococcal meningitis vaccines: The Advisory Committee on Immunization Practices (ACIP) currently recommends this vaccine for freshman planning to live in campus dormitories/residence halls. The ACIP also recommends a booster dose of meningococcal vaccine for students who received their primary dose before the age of 16 years. Students wishing to decline the vaccine must first read the information in the box below. Signing the waiver indicates that you understand the possible risk involved in not receiving this vaccine. If you are under the age of 18, a parent or guardian must sign the waiver for you.

Waiver Statement-Meningococcal Meningitis: College students, especially freshman living in residence halls, are at a slightly increased risk for contracting meningococcal disease. The bacterial form of this disease can lead to serious complications such as swelling of the brain, coma, and even death within a short period of time. Three vaccines are currently available that decrease, but do not completely eliminate, a person's risk of acquiring meningococcal meningitis. This element of uncertainty remains because there are (5) different serotypes (A, B, C, Y and W-135) and the current vaccines do not offer any protection from serotype B. For more specific information about meningococcal meningitis and college student risks, please visit UCF Student Health Services website: <http://www.studenthealth.ucf.edu/immunizations>

Waiver Statement-Hepatitis B: Hepatitis B (HBV) is a serious viral infection of the liver that can lead to chronic liver disease, cirrhosis, liver cancer, liver failure, and even death. This disease is completely preventable. Hepatitis B vaccine is available to all age groups to prevent Hepatitis B viral infection. A series of three doses of vaccine are required for optimal protection. Missed doses may still be sought to complete the series if only one or two have been received. The HBV vaccine has a record of safety and is believed to confer lifelong immunity in most cases. For more specific information about Hepatitis B disease and vaccines, please visit UCF Student Health Services website: <http://www.studenthealth.ucf.edu/immunizations>

Section B: Recommended Immunizations for Good Health

- Td (Tetanus)/Diphtheria or/and Tdap (Tetanus/Diphtheria/Pertussis) - Booster shot within last 10 years. Space is provided to record this information.
- Varicella (Chicken pox) - History of disease or vaccine is acceptable. Indicate the date you had chicken pox. OR: Provide proof of two doses of Varivax. OR: Provide results of a blood test on a laboratory form.
- Hepatitis A, HPV, Polio, Influenza, Other - In the boxes provided in this section you may also list any additional vaccines that were administered. These are not required.

Section C: Identify if you have Type (1) Diabetes and whether or not you are interested in participating in the UCF Student Health Services program to help students with Type (1) Diabetes.

Section D: A signature of parent or guardian MUST be included on the form if the student is under the age of 18.

For more Helpful Tips to complete the immunization form and for information about valid exemptions, check out UCF Student Health Services website at: <http://www.studenthealth.ucf.edu/immunizations>
